

Swiss Epidemiology Winter School 2020

Advanced Methods in (Network) Meta-Analysis – A Practical Course in R 20 – 22 January 2020

Faculty

Prof. Georgia Salanti

Institute of Social and Preventive Medicine (ISPM), University of Bern, Switzerland

Dr. Guido Schwarzer

Institute of Medical Biometry and Statistics (IMBI), University of Freiburg, Germany

Venue

CH – 3823 Wengen | SWITZERLAND

Hotel Sunstar (see map on <http://www.epi-winterschool.org/hotels>)

Description

Standard meta-analysis methods for clinical and epidemiological studies are widely used with focus on comparisons of two interventions, such as a drug versus a placebo, or a new intervention versus standard practice. However, contemporary research questions require methods that are beyond the state-of-the-art. Investigators often need to synthesize data that are potentially subject to small-study effects / publication bias, several health outcomes or need to compare more than two interventions for the same condition. Extensions of meta-analysis methods to address these aims have been the subject of much methodological research in recent years, and are increasingly being applied. This course will explain the theory and application of meta-regression models, methods to investigate the risk of publication bias, multivariate meta-analysis, and network meta-analysis.

This course is aimed at statisticians, epidemiologists, and other quantitatively-minded researchers who want to understand and undertake beyond-the-standard statistical syntheses of clinical trials. Knowledge of systematic reviews and the fundamentals of meta-analysis is expected of all participants. Participants must be statistically literate, including a good understanding of linear regression, meta-analysis, random-effects models and matrices. Computer practicals will use R packages requiring basic experience with R software.

Objectives

By the end of this course participants will:

- understand the role and potential of meta-regression, multivariate meta-analysis, dose-response meta-analysis and network meta-analysis
- understand the potential and limitations of methods to detect and account for small-study effects
- understand the principles, steps and statistical methods involved
- be able to perform the above mentioned methods using R packages.

Target audience	Researchers in health sciences with some experience or understanding of the basics of meta-analysis who wish to expand their knowledge and skills in the context of clinical effectiveness evaluation.
Outline	<p>The course will run over three days and consist of lectures, group work and computer practical sessions. We start early in the morning with a review of the previous day. During the extended break in the afternoon participants review course materials, catch up on emails or go skiing. We reconvene at 4:30 pm for the computer sessions.</p> <p>Monday, 20 January (8:00 – 12:00 16:30 – 18:30)</p> <ul style="list-style-type: none"> • Meta-analysis of pairwise comparisons; methods to estimate heterogeneity and summary effects • Meta-regression models • Methods to investigate the potential influence of publication bias <p>Tuesday, 21 January (8:00 – 12:00 16:30 – 18:30)</p> <ul style="list-style-type: none"> • Multivariate meta-analysis • Dose-response meta-analysis • Indirect and mixed treatment comparisons <p>Wednesday, 22 January (8:00 – 12:00 16:30 – 18:30)</p> <ul style="list-style-type: none"> • Network meta-analysis • Reporting standards and quality assessment of network meta-analyses
Credits	1.0 ECTS
To bring along	Students should bring their own portable computers. University of Bern IT staff onsite can provide help upon request per e-mail (it@ispm.unibe.ch)
Course book	Schwarzer G, Carpenter JR, Rücker G. (2015) <i>Meta-Analysis with R</i> . The book will be provided on the first course day.
Course fee	SSPH+ students: CHF 750 Academic: CHF 950 Industry: CHF 2050
Registration	You can register on the Winter School website www.epi-winterschool.org .
Accommodation	Participants must book their accommodations themselves. Please see our recommendations on www.epi-winterschool.org/hotels for special prices.
